

Call for Junior and senior group leaders

The Grenoble Institute of Neurosciences (GIN), an outstanding research center devoted to understanding brain functions and the development of innovative clinical therapies for neurological, neuromuscular and psychiatric disorders, is welcoming applications for positions as junior and senior group leaders in basic and/or clinical research.

The GIN has more than 6.000 m² dedicated to research in Neuroscience in close proximity to many high level research centers, offering a unique opportunity for the development of trans-disciplinary projects. Eleven research teams host 240 researchers, clinicians, students and technicians. The GIN is equipped with state-of-the-art technology platforms such as MRI, EEG, TMS, a photonic

The candidates are expected to develop an independent and high quality research program within the Institute.

Junior positions: the Institute is offering a start-up package and laboratory space for up to 6 persons. Candidates should hold a PhD and/or an MD degree, have strong postdoctoral experience and meet criteria to obtain national (ANR, Atip-Avenir, FRM Amorceage, etc.) and international funding, and a French research institutional position (Inserm, CNRS).

Senior positions: the Institute is offering a start up package and laboratory space for up

imaging center (PIC-GIN), and electron microscopy providing the necessary resources for high standard and innovative research.

Research at the GIN spans from brain development to adult brain plasticity, from the molecular to the most integrated levels, using cell lines, animal models and clinical trials. Currently studied pathologies of the adult nervous system include Parkinson's, Huntington's and Alzheimer's diseases, epilepsy, vascular disorders, mood and anxiety disorders.

For further information:

► <http://neurosciences.ujf-grenoble.fr>

(sorry, the English version is currently under construction)

to 12 persons. Candidates should have previous experience as principal investigator of research projects with national and/or international funding, and hold a French institutional research position (Hospital, University, Inserm, CNRS).

Applications (in English) should be send before November 15th to:

► gin-direction@ujf-grenoble.fr

A single pdf file should include a curriculum vitae with the list of publications, names and addresses of three references (3 pages max), a brief description of research accomplishments and research plans for the next 5 years (5 pages max).

• Paris

• Grenoble

Grenoble is a very active research city in France, with renowned Institutes such as the European Synchrotron ESRF, the EMBL, the Institute of Structural Biology (IBS) and the Institut Louis Néel in Physics allowing multidisciplinary approaches to the GIN's scientists.

Grenoble University has about 70,000 students, is among the top

five French universities and was ranked as the best place to study in 2013.

Grenoble has a population of more than 650,000 and is located in the southeast of France, in the heart of the Alp mountains.

Grenoble is three hours from Paris by train and less than one hour from renowned skiing areas.
